

PRIMOBAL-BAGS MADE OF RECYCLED LEATHER

The main benefits of recycling are reducing the need for new raw materials, utilizing waste instead of sending it to landfills, and overall environmental conservation. Our bags are suitable for shopping and also as a promotional product. We can produce them with a stamped or screen-printed advertisement. We offer various sizes and can create a shape and size according to customer requirements. The bag can have a smooth surface, an all-over stamp of sunflowers or leaves, or an imitation of natural leather.

CV 0151 Sunflowers (natural)

The dimensions of the product are:
